BEE International is a worldwide supplier of high pressure homogenizing systems to the Pharmaceutical, Biotech, Chemical, Cosmetic and Food industries since 1994. We develop, manufacture and market laboratory and production systems enabling our customers to develop innovative new products and to produce them more economically than ever before. We are a small organization looking for hard working and motivated individuals to help us grow. We have an opening for a Manufacturing Technician and seek a highly motivated mechanically skilled, detail oriented, well-organized, team player.

This role provides direct labor for the manufacturing and service of high quality high pressure homogenizing systems. Key responsibilities of the job include:

- Assemble custom machinery including hydraulic, electrical (basic), and pneumatic assemblies
- Fabricate custom parts using a drill press, grinder, and also coning, threading, and bending tubes and other fixtures
- Troubleshoot problems on machines during assembly
- Maintain production area in good order including inventory and work in process
- Provide technical support and training to customers
- Travel typically 10% of time for customer installations and service

**Minimum requirements:**

- Good manual dexterity
- Strict attention to detail
- Strong analytical skills and mechanical aptitude
- Ability to read mechanical and electrical drawings is a plus
- Ability to work well in a group environment
- Good work ethic, good communication skills

**Compensation**

BEE offers competitive salary and benefits including health care, 401K and paid time off.
